Comments: Lots of younger dogs tested, which is a slight concern as just Auscultation testing is best used for monitoring not a definitive guide for breeding dogs. It would be better to see more older ex-breeding dogs to provide information as how good their mitral valve stays post breeding, some more family lines information can be used in coming to breeding decisions. Personally I would have any breeding dogs scanned first under the KC/ VCS/ Cavalier club scheme.

Also screened: 6 x Whippets, 1 x Rottweiler, 6 x Field Spaniels, 3 x Gordon Setters, 4 x Boxers and 1x GSD.

Total Dogs Auscultated / tested
52 x CKCS and 21 other dogs.
